

**PATRIOT - SENTINEL TRUE LOW AIR LOSS  
WITH AIR BOLSTERS**

MADE IN THE U. S. A.  
HUFFMAN, TEXAS

- \* True air loss therapy provides the ideal microclimate for wound healing
- \* Three pressure zones provide advanced pressure relief
- \* Pulsation mode assists in stimulating capillary circulation
- \* Side air bolsters define the mattress surface to assist in fall prevention
- \* Comfortable low shear, low friction, vapor permeable cover
- \* One touch AUTOFIRM to facilitate transfers and position changes
- \* Key pad lockout eliminates unauthorized changes to therapeutic settings

The Wound K-Air Management, Patriot Sentinel provides advanced pressure relief with true low air loss therapy to provide the ideal microclimate for wound healing. Delivering up to 1000 liters of air per minute to the true low air loss surface reduces heat and moisture build-up at the patient, surface interface. Reducing heat and moisture reduces the detrimental effects they can have on pressure, shear and friction. Three modes of operation and simple comfort adjustments allow the user to customize therapy. Static mode provides continuous advanced pressure relief with true low air loss. Pulse mode provides all the benefits of the Static mode with the addition of gentle pulsating pressure to aid in stimulating blood flow. By engaging the Autofirm mode the Patriot ALAL quickly provides a uniform firm surface to facilitate care giving from position changes to transfers.
